

**Stephen Hippler, M.D. – Chief Clinical Officer, OSF HealthCare**

**OSF achieved a high ACO quality score**

OSF is proud to report that we had a cost savings last year, and a quality score of 98.13% in our most recent ACO quality results. The fact that this occurred in spite of the COVID pandemic is a huge testament to the care and dedication that is provided each and every day by our physicians, our advanced practice providers and all of our other clinicians. (:31)

**OSF does what is necessary to care for all patients**

We are doing what it takes to provide better care to the population we serve following the guide of the Quadruple Aim: better care for people at a lower cost of care, at the same time providing a great patient experience, and a great experience for our caregivers. (:19)
